

archive transfers and restoration solutions

TVP Archive

ARCHIVE

consultancy services

At TVP Archive we are sensitive to our industry's constraints. Archives are often under staffed and under funded which inevitably results in compromise. As guardians of our audio visual heritage there are always pressures simply to keep heads above water! Today's world presents many technological benefits but these require evolving philosophies.

TVP Archive offers a consultancy program designed to help to prioritise conservation and migration needs.

The specialist members of our team can visit your collection, listen to your concerns and then help in assessing what is the most practical and cost effective strategy. Solutions have ranged from on-site technical installation with associated training to allow an internally led migratory program through to an entirely out sourced service

Clients include: **British Pathe, BBC, ITN, Bank of England, MoD.**

Uniquely placed to offer in-depth knowledge of some of the more vulnerable formats such as 2" Quadruplex, 1" B & C and D3, TVP Archive not only has the personnel to operate but also the engineering support required to keep these machines working!
